IDENTIFIERS *Washington

ABSTRACT

Data tables summarize various aspects of enrollment and services at the Washington community colleges, providing fall quarter data for 1977 through 1981. After introductory material highlighting the significant changes in the community colleges' profile, the report provides headcount and full-time equivalent (FTE) enrollment data by funding source and data on state-supported FTE faculty by employment status; state-supported FTE students by academic and occupational course intent and by time and location; and rates of change in state-supported FTE students and faculty and course sections. The report then goes on to provide information about the characteristics of students enrolled in state-supported or contracted classes. Data are broken down by full-/part-time status, student intent, age, source (i.e., high school, transfer, etc.), ethnic groups, and sex. Next, data from individual colleges and districts for fall 1980 and fall 1981 are presented in terms of FTE; time and location; faculty by employment status; academic/occupational course section offerings; headcount enrollment by institutional intent and funding source; and academic/occupational student headcount by student intent and ethnic group. Highlights reported from the fall 1980 and fall 1981 comparisons include a 30% reduction in part-time faculty and a 4% reduction in full-time faculty; a drop of 29.7% in evening and off-campus enrollments; and a decrease in part-time students. FOREWORD

The Washington Community College Fall Quarter Report 1981 is the second edition of an annual report published following the conclusion of fall quarter. Typically, fall quarter is the focal point for community college data and is considered the term most reflective of college activities throughout an academic year.

The Fall Quarter Report is one of two annual informational and reference publications prepared by the State Board for Community College Education. The second is the Washington Community College Factbook, which includes information based on the full academic year, and is published following the conclusion of the academic year.

FALL QUARTER REPORT 1981

INTRODUCTION AND HIGHLIGHTS

The community college profile in the fall of 1981 reveals a very different community college system from the profile for the fall of 1980. The changes are attributable to several events:

- The budget for the second year of the 1979-81 biennium was reduced by a total of five percent (a three percent and then a two percent reduction).
- Formula support levels were reduced in the 1981-83 budget.
- On September 17, 1981, Governor Spellman ordered a 10.1 percent cut across the board.
- Finally, the legislature cut the budget by five percent, thereby restoring half of the reduction ordered by the governor.

The cumulative effect of these budgetary constraints and uncertainties has had an immediate reaction at the colleges in the form of fewer faculty, fewer classes, and fewer students supported by state funds.

- Faculty was reduced by 576 Full-Time-Equivalent Faculty with the greatest impact felt in the part-time faculty which were reduced by 30 percent while full-time faculty were reduced by 4 percent.
- Course sections offered were reduced by 3,980 sections, from 21,959 to 17,979.
- FTE-Students dropped by 14,138. This represented a drop of 5.8 percent in day-on-campus enrollments and 29.7 percent in evening and off-campus enrollments.
- Full-time students dropped by 4,833 from 69,910 down to 65,077. Part-time students had a dramatic change from 122,439 down to 82,971, a drop of 39,468.

This report reviews some of the elements of these significant differences by summarizing the various aspects of enrollment and services provided. In order to provide historical context, the last five fall quarters are included.

Headcount enrollment leveled off during Fall Quarter 1980 and then dropped more sharply than FTE enrollment during Fall Quarter 1981. This is because part-time students represent 89% of the overall decrease in enrollment.

The illustrated decrease in enrollment reflects a net change resulting from a decrease in state supported enrollments and somewhat offsetting increases in contract and self supporting community service enrollments (see Table 2).

Annual Change	+3,467	+1,210	+8,057	+5,592	-11,402
% Change	+4%	+1%	+2%	+6%	-11%

The impact of budget cuts on community college enrollment is evidenced by the 15% decrease (-14,138 FTE's) in state supported FTE students from Fall Quarter 1980 to Fall 1981. While contract supported FTE's made up only six percent of the total enrollment, the offsetting 44% increase (+1,567 FTE's) in the contracted area shows the result of efforts to seek alternative ways to continue providing services.

Self supporting community service FTE's reached a first-time level of 3% of the total enrollment. The increase from 2% during Fall Quarter 1980 is partially due to a revision in the course coding methodology.

Fall Quarter 1981 shows state supported student headcount enrollment continuing to decrease, bringing it to its lowest point in at least five years. The 25% (-45,436) drop from Fall 1980 results primarily from a decrease in part-time student enrollment.

% Change	+8%	+4%	+7%	-5%	-14%

The majority of reductions in state supported faculty were made in the part-time and moonlight areas: a 30% decrease (-491 FTE-Faculty) from Fall Quarter 1980 to Fall 1981. Reductions in previously appropriated funds necessitated impacting employees without long-term contracts or tenure.

SOURCE: SBCCE Course Effort Report MIS-2:IM2055

The relative rates of change among students, faculty, and course sections illustrate the saturation point the system reached in 1980. Prior to 1980, Faculty, Course Sections, and Students were increasing at corresponding rates. In 1980, however, due to budget cuts, faculty and sections had to be reduced. By increasing the ratio of students to faculty from 22 to 24, a continued increase in enrollment was accommodated. This approach could not be continued with the additional budget reductions in 1981, when faculty, course sections, and students dropped at corresponding rates.

ACADEMIC AND OCCUPATIONAL STUDENTS BY STUDENT INTENT

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1977 THRU 1981

Tables 10 and 11 on the following two pages provide the background numbers for this graph of students based on their stated intent for enrolling. The sharpest decreases are in those students enrolled for general studies and those enrolled to upgrade their job skills (occupational supplemental). Again, these are reflective of the decreases in off-campus and evening classes which predominantly cater to these students.

ACADEMIC AND OCCUPATIONAL STUDENT HEADCOUNT
BY AGE GROUPS

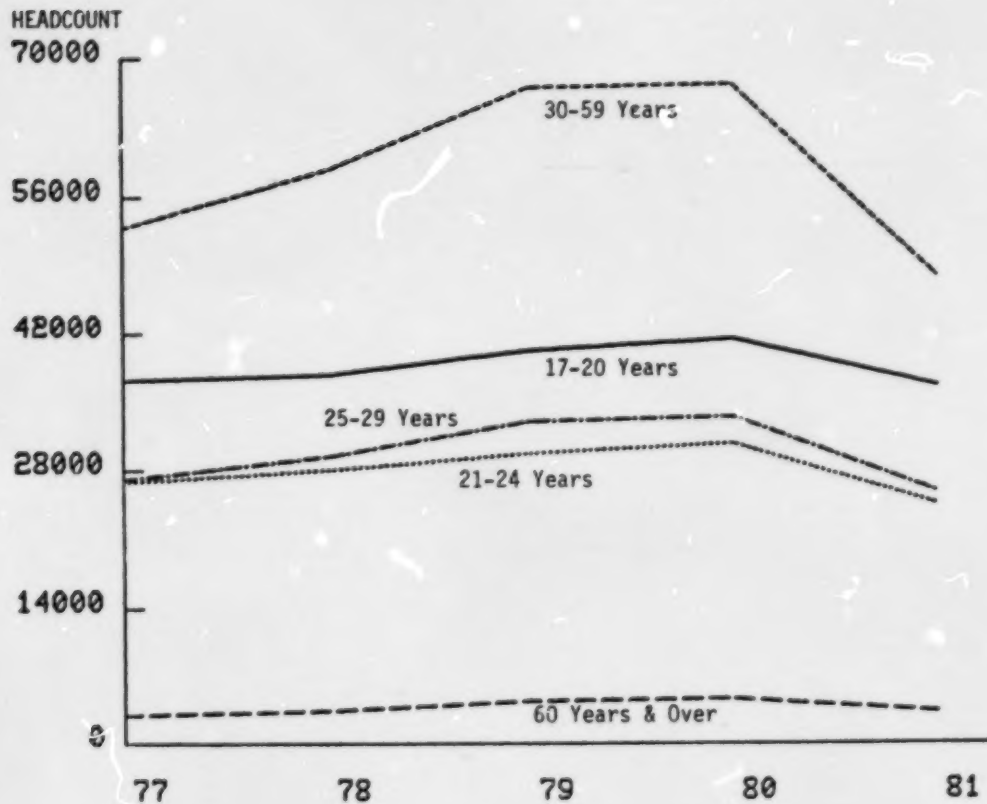

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1977 THRU 1981

The sharpest decrease is in the 30-59 age group which is reflective of the large drop in part-time student enrollment.

The increase in the percent of total enrollment that is in the 17-20 age group is reflective of an increase in the number of students coming from high school.

ACADEMIC AND OCCUPATIONAL MINORITY STUDENT HEADCOUNT
BY ETHNIC GROUPS

WASHINGTON COMMUNITY COLLEGES
FALL QUARTERS 1977 THRU 1981

This graph only shows changes for the various "target minority" groups. The large influx of Southeast Asian refugees is quite evident. The other minority groups, while decreasing in numbers enrolled, are not decreasing any faster than the white student group (see Table 14).

% Change	+9%	+7%	+14%	-1%	-23%

The decrease in female enrollment is somewhat sharper than that for males. This is because more women attend on a part-time basis, and the courses typically attended by part-time students were substantially curtailed.
